Incremental 40-mm-dia. Rotary Encoder

E6B2-C

CSM_E6B2-C_DS_E_4_1

General-purpose Encoder with External Diameter of 40 mm

• Incremental model

⚠

- External diameter of 40 mm.
- Resolution of up to 2,000 ppr.

Be sure to read *Safety Precautions* on page 4.

Ordering Information

Encoders [Refer to Dimensions on page 4.]

Power supply voltage	Output configura- tion	Resolution (pulses/rotation)	Model	
5 to 24 VDC	NPN open-collector output	10, 20, 30, 40, 50, 60, 100, 200, 300, 360, 400, 500, 600	E6B2-CWZ6C (resolution) 0.5M Example: E6B2-CWZ6C 10P/R 0.5M	
		720, 800, 1,000, 1,024		
		1,200, 1,500, 1,800, 2,000		
12 to 24 VDC	PNP open-collector output	100, 200, 360, 500, 600	E6B2-CWZ5B (resolution) 0.5M Example: E6B2-CWZ5B 100P/R 0.5M	
		1,000		
		2,000		
5 to 12 VDC	Voltage output	10, 20, 30, 40, 50, 60, 100, 200, 300, 360, 400, 500, 600	E6B2-CWZ3E (resolution) 0.5M Example: E6B2-CWZ3E 10P/R 0.5M	
		1,000		
		1,200, 1,500, 1,800, 2,000		
5 VDC	Line-driver output	10, 20, 30, 40, 50, 60, 100, 200, 300, 360, 400, 500, 600		
		1,000, 1,024	E6B2-CWZ1X (resolution) 0.5M Example: E6B2-CWZ1X 10P/R 0.5M	
		1,200, 1,500, 1,800, 2,000		

Accessories (Order Separately) [Refer to Dimensions on Rotary Encoder Accessories.]

Name	Model	Remarks	
	E69-C06B	Provided with the product.	
Couplings	E69-C68B	Different end diameter	
Coupings	E69-C610B	Different end diameter	
	E69-C06M	Metal construction	
Flanges	E69-FBA		
i lallyes	E69-FBA02	E69-2 Servo Mounting Bracket provided.	
Servo Mounting Bracket E69-2			

Refer to Accessories for details.

*1. An inrush current of approximately 9 A will flow for approximately 0.3 ms when the power is turned ON.

*2. The line driver output is a data transmission circuit compatible with RS-422A and long-distance transmission is possible with a twisted-pair cable. The quality is equivalent to AM26LS31.

*3. The maximum electrical response speed is determined by the resolution and maximum response frequency as follows:

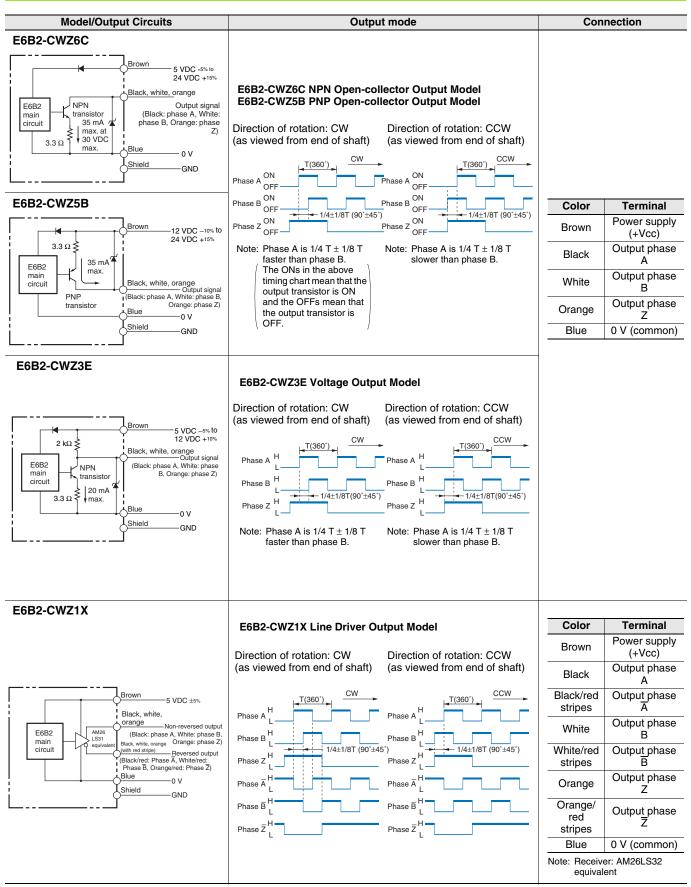

Maximum response frequency ×60 Maximum electrical response speed (rpm) = -

Resolution

This means that the E6B2-C Rotary Encoder will not operate electrically if its speed exceeds the maximum electrical response speed.

E6B2-C

I/O Circuit Diagrams

Note: 1. The shielded cable outer core (shield) is not connected to the inner area or to the case.

2. The phase A, phase B, and phase Z circuits are all identical.

3. Normally, connect GND to 0 V or to an external ground.

Safety Precautions

Refer to Warranty and Limitations of Liability.

WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Safe Use

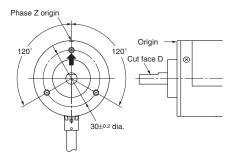

Incorrect wiring may damage internal circuits.

Precautions for Correct Use

Do not use the Encoder under ambient conditions that exceed the ratings.

Mounting

- Origin Indication
- It is easy to adjust the position of phase Z with the origin indication function. The following illustration shows the relationship between phase Z and the origin. Set cut face D to the phase Z origin as shown in the illustration.

• Do not extend the length of the cable to more than 2 m. If the cable must be more than 2 m, use a Model with a Line-driver Output (max. length: 100 m).

Wiring

Spurious pulses may be generated when power is turned ON and OFF. Wait at least 0.1 s after turning ON the power to the Encoder before using the connected device, and stop using the connected device at least 0.1 s before turning OFF the power to the Encoder. Also, turn ON the power to the load only after turning ON the power to the Encoder.

(Unit: mm)
